Profile

Systems Engineering student (eighth semester). Hands-on experience building AI solutions: RAG systems, conversational agents, Business Intelligence with Power BI, and language model security (LLM red teaming). Focused on developing safe and useful AI products, combining full-stack development, machine learning, and good cybersecurity practices.

Motivated to start a professional career as a junior engineer and to strengthen technical skills.

Education

Universidad Santo Tomás, Systems Engineering (Student) - Tunja, Colombia 2022 - present
Currently in ninth semester.

- Training in programming, systems analysis, and software development
- Introduction to good information security practices and data handling

Colegio Campestre San Diego, High School Diploma (Graduate) - Colombia 2006 - 2021

Projects

University Hackathon 2025 - Colombia 2025 - present

Winning project in a hackathon organized by Universidad Santo Tomás.

- Built a technological solution as a team under pressure and limited time
- Applied programming logic, analysis, and collaborative teamwork
- Considered good security practices and data validation
- Institutional recognition for innovation and performance

Academic Visit to Google Colombia - Colombia 2025 - present

Award granted by the Governor's Office after winning the hackathon.

- Exposure to organizational culture and good software engineering practices
- Observation of real professional technology environments

Alma - RAG Chatbot (full-stack academic project) 2026 - present

Academic project.

- Full-stack platform with CMS, REST APIs, and PostgreSQL.
- RAG chatbot with FAISS, sentence-transformers, and Groq API.

LLM Security Lab (prompt injection / red teaming) 2026 - present

Academic project.

- Penetration testing on own RAG chatbot: five types of prompt injection attacks.
- Tools: OWASP ZAP, Burp Suite, Nmap, Nessus, Maltego; formal evaluation document.

Experience

Data & AI Analyst Intern 2026

Seguros del Estado S.A. (IT Vice Presidency)

- Development of Business Intelligence dashboards in Power BI: data modeling (star schema) and DAX measures.
- Building conversational AI agents with Copilot Studio integrated via Power Automate.
- Analysis of AI tool adoption and report automation.
- Technical documentation of processes and architectures (diagrams and guides).

Skills

AI / Machine Learning: RAG systems (FAISS, sentence-transformers), LangChain, LLMs (Groq, Gemini), CNN, classification models

Security / LLM Security: Prompt injection and red teaming, OWASP Top 10, OWASP ZAP, Burp Suite, Nmap, Nessus, Maltego

Business Intelligence: Power BI (star schema modeling, DAX), Copilot Studio, Power Automate

Web Development / Full-stack: Next.js, React, Node.js, Tailwind CSS, Supabase, PostgreSQL, REST APIs

Soft Skills: Teamwork, communication, leadership, organization, adaptability to change

Languages

Languages: Spanish (native), English (conversational), Portuguese (basic)
